FOR ADULTS 18+ · WORKS WITH ANY APP

Your AI girlfriend pricing checklist

Don’t let tokens surprise you. Find out what an app really costs in one week, before it costs you a whole year.

THE GOLDEN RULE

The plan price is only the entry fee. Pictures and voice usually cost extra.

How it works: three short moments

1

Before you pay

Know the plan, the tokens and your limit.

About 5 minutes

2

Your first week

Log what you actually use, day by day.

1 minute a day

3

Before a yearly plan

Six boxes to tick before you commit.

About 5 minutes

Tick the boxes and fill in your log right in this PDF, or print it out.

BEFORE YOU PAY · ABOUT 5 MINUTES

Read the price tag properly

Plans cover the chatting. The fun extras are sold separately.

- [ ] **Try the free plan first**
  It's for testing the chat and setup, not for judging the real price.
- [ ] **Find out what one picture, voice clip and video costs**
  Look for "tokens," "coins" or "credits" on the pricing page.
- [ ] **Turn every price into a monthly price**
  Weekly prices look small but add up. Multiply a weekly price by about 4.3.
- [ ] **Check where you're paying: the website, or Apple or Google**
  It decides where you cancel, and how refunds work.
- [ ] **Screenshot the cancel page before you pay**

My monthly limit
The most I'll spend on this app, extras included.

Your phone can help. Google Play lets you set a monthly budget, and iPhone Screen Time can block in-app purchases altogether.

YOUR FIRST WEEK · 1 MINUTE A DAY

Keep a 7-day spending log

The only way to know your real cost is to watch it happen.

DAY	WHAT I DID	TOKENS USED	MONEY SPENT
Example	Chat only, no pictures	0	$0
Example	14 selfies and 6 voice clips	About 100 (the whole month)	Top-up needed
Day 1			
Day 2			
Day 3			
Day 4			
Day 5			
Day 6			
Day 7			
Total	Plan + packs this week		

The examples come from our Candy.ai test in September 2026: a chat-only day used no tokens, and one selfie evening used the whole month's allowance.

- [ ] **I had at least one chat-only day and one picture or voice evening**
  So I know both ends of my real cost.

Tip: note your token balance at the same time every day, like before bed.

SIX PRICING TRAPS

Spot them before they spot you

Every app we test uses at least one of these.

Trap 1

The plan isn't the real price

Pictures, voice and video usually cost tokens on top.

Avoid it: Look up what one picture costs before you start.

Trap 2

Free is a test, not a plan

Free plans are capped. Daily pictures almost always need a paid plan.

Avoid it: Use free to decide if you like her.

Trap 3

A year before you know your habits

Yearly looks cheap per month, but only if you still use it in month three.

Avoid it: Pay monthly first.

Trap 4

Weekly prices at checkout

A small weekly number can cost more than a monthly plan.

Avoid it: Turn every price into a monthly price.

Trap 5

Redoing pictures eats tokens

Every redo costs again, and small details drift.

Avoid it: Name the details you want (earrings, hair) instead.

Trap 6

Refunds aren't guaranteed

Rules depend on how you paid, and used tokens complicate it.

Avoid it: Save your order confirmation.

The real-cost formula

Plan per month + **Token packs** number × price = **Real monthly cost** compare to your limit

Real costs we measured (September 2026)

Candy.ai

Mostly chat
about $14/mo

Lots of selfies or voice
about $25–45/mo

OurDream AI

Plan only
about $20/mo

Busy weeks of building
about $25–40/mo

Backyard AI

On your own computer
$0/mo

With cloud models
about $9–35/mo

From our week-long tests. Prices change, so check each app's own pricing page. Full details in each review on our site.

Before you pay for a year

Tick all six, or stay monthly. No pressure.

- [ ] **I've used the app monthly for at least one normal month**
- [ ] **I know what a picture, a voice clip and a video cost**
- [ ] **A normal month, extras included, stays under my limit**
- [ ] **I've turned every price into a monthly price, including weekly offers**
- [ ] **I've saved my order confirmation and a screenshot of the cancel page**
- [ ] **I know whether I paid on the website or through Apple or Google**

Spending more than you planned? Set a hard budget in your app store, take a week off, and talk to someone you trust. An app should be fun, not a worry.
